## BUREAU INVITES PROPOSALS FOR NEVADA GRADING

### Bids August 10 on Owyhee River National Forest Project

District Engineer C. H. Sweetser of the United States Bureau of Public Roads this week issued a call for bids for grading Section C of Route 18, the Owyhee River National Forest Highway in Elko County, Nevada, a distance of approximately 2.578 miles.

Bids will be opened at the Federal Office Building, San Francisco, August 10.

Principle items include: 14 acres clearing and grubbing; 54,300 cu. yds. unclassified excavation; 600 cubic yards unclassified excavation for structures; 125 cubic yards Class "A" concrete; 10,300 pounds reinforcing steel; 926 lineal feet corrugated galvanized sheet metal pipe, and 27,400 lineal feet barbed wire fence.

Plans and specifications may be obtained from the office of District Engineer C. H. Sweetser upon deposit of \$10.00.

### Two Other Projects

Two other Bureau of Public Roads jobs are out for bids. Both are located in Shasta County and both will be opened July 27.

The first is for grading 5.133 mi. of Section J of Route 77, the Mt. Shasta - Mt. Lassen National Forest Highway. Principle items are: 33.5 acres grubbing and clearing; 142,100 cubic yards unclassified excavation; 28,260 pounds reinforcing steel; 15,000 cubic yards unclassified excavation for borrow, and 1,878 lineal feet corrugated galvanized sheet metal pipe.

The other contract calls for construction of Lake Britton Bridge on Section J, Route 77, the Mt. Shasta-Mt. Lassen National Forest Highway. Approximately 170,000 pounds of reinforcing steel and 942,000 pounds of structural steel are involved.

Both jobs are listed as costing approximately \$250,000 in the aggregate, in the California Forest Highway program.

### WILL INVITE NEW WAREHOUSE BIDS

Bids for construction of a warehouse addition to the plant of the Dreamland Bedding Co. at 534 Bayshore boulevard, San Francisco, were rejected yesterday, the owner announced. Revisions will be made in the plans and new bids asked shortly, it was stated.

The building is to be a two-story structure, 100 by 100 feet in size. Plans are by Architect Geo. M. Cantrell, with H. P. Hoyt as structural engineer.

## Sarver & Zoss Bid Burbank Post Office

WASHINGTON, D. C., July 20.—Sarver & Zoss, Inc., 1015 West Fourth Street, Los Angeles, today submitted low bid to the Treasury Department here for construction of the U. S. Post Office in Burbank, Calif. Amount of the low proposal was \$127,300.

Second lowest bidder for the Burbank post office was Robert E. McKee, Los Angeles, who figured the contract at \$130,800.

Plans for the Burbank structure, as for most federal buildings, were prepared under direction of the Treasury Department supervising architect. Bids received today were held under advisement.

### WESTINGHOUSE OPENS PLANNING INSTITUTE

Pittsburgh has been selected as the location of Westinghouse Electric and Manufacturing Company's first complete kitchen and laundry planning institute, which will be maintained as a service center for problems pertaining to the planning of efficient workrooms in homes and apartments.

The institute will be located on the first floor of Boggs & Buhl's department store and will serve as a working exhibit of the modern engineered kitchen and its companion workroom in the home, the laundry, company executives say.

## BIDS AUGUST 11 ON TWO STATE HIGHWAY JOBS

### Commission Advertises Work in Kern, San Luis Obispo, Santa Barbara

SACRAMENTO, July 20.—Bids on two state highway projects were invited today by the State Highway Commission. Proposals on both contracts will be opened in Sacramento August 11, it was announced.

The jobs are located in Kern county and in San Luis Obispo and Santa Barbara counties.

The Kern county project is about nine-tenths of a mile in length and involves grading and plant-mixed surfacing. Work will be located through the town of Mojave.

### Bidding Items

Principal bidding items are: 6-100 cubic yards unclassified roadway excavation; 9,000 cubic yards imported subgrade material; 30 tons liquid asphalt type SC-2 in prime coat and as detour surfacing; 3550 tons mineral aggregate plant-mix surfacing; 224 tons liquid asphalt MC-3 or MC-4 plant-mix surfacing; 8450 square yards asphaltic paint binder; 1900 square yards preparing, mixing and shaping detour material; and others.

The other project authorized for advertising today is located between Las Cruces and Lompoc and between Lompoc and Santa Ynez in San Luis Obispo and Santa Barbara counties. It is about 18.5 miles in length.

Bidding items include 34,000 sq. yds. asphaltic paint binder; 132 tons asphalt surfacing; 2500 tons mineral aggregate in surfacing; 200 tons seal coat; and 2350 tons screenings in seal coat.

### POSTPONE MEETING DATE

Next regular meeting of the Sa. Francisco Architectural Club will be held in the club headquarters Wednesday evening, July 14, it is announced.

## BIDS AUGUST 18 FOR \$1,000,000 STATE PROJECT

### Will Link Span With Terminal; Mono Surfacing Out for Proposals

SACRAMENTO, July 27.—Bids for construction of the \$1,000,000 San Francisco viaduct of the San Francisco - Oakland Bay Bridge railway facilities will be opened August 18, State Director of Public Works Earl Lee Kelly announced today.

Proposals will be opened at the bridge offices, 500 Sansome street, San Francisco.

To carry electric interurban trains from the bridge to the San Francisco terminal at First and Mission streets, the viaduct is the last major construction contract in the bridge railway program.

#### Major Items

Among major bidding items will be: 45,000 feet of timber piling; 5500 feet of concrete piling; 4500 cubic yards of concrete in foundations; 12,500 cubic yards of concrete above foundations; 1400 cu. yds. concrete deck on steel spans; 3,300,000 pounds reinforcing steel; 100,000 pounds miscellaneous steel work; and lump sum items covering demolition of buildings, drainage, street work and waterproofing the deck.

SACRAMENTO, July 27.—One state highway contract was authorized here today by the State Highway Commission.

Located in Mono county between Mammoth Lakes and Route 23 near Casa Diablo Hot Springs, the job involves placing surfacing material and applying road-mix surface treatment over a length of about nine miles.

Bids will be opened in Sacramento August 18, at the same time proposals are being taken in San Francisco for construction of the Bay Bridge railway viaduct.

Approximately \$848,355,000 was expended on State administered roads in the United States during 1935, according to statistics compiled by the U. S. Bureau of Public Roads.

## \$120,000 Low Bids Submitted on Four State Span, Highway Improvement Jobs

SACRAMENTO, July 28.—Low bids aggregating approximately \$120,000 were submitted to the State Highway Commission here today on four contracts for bridge construction and highway improvements. Charles L. Harney, San Francisco, at \$38,579 was the lowest of eleven bidders for grading and applying penetration oil treatment to

1.1 miles in Mendocino county, between Point Arena and southerly county line.

Total bids on the Mendocino project were as follows:

Chas. L. Harney, S. F.	\$38,579.00
N. M. Ball Sons, Berkeley	38,951.00

Geo. French Jr., Stockton	28,810.00

## Exposition to Ask Pressure Main Bids

Bids for construction of the first unit of a high pressure water system on Exposition Island will be called within the next few days by the San Francisco Bay Exposition Company, it was announced yesterday.

The project will consist of about six miles of welded steel pipe, varying in diameter from four- to 16-inches.

Eaton and Smith, at \$79,657.92, submitted the low bid to the Exposition Company for construction of the first unit of a storm sewer system on Yerba Buena Shoals, the company announced. The other bidders were not revealed.

J. A. Casson, Hayward... 34,075.00

#### Poso Creek Span

For constructing a reinforced concrete slab bridge across Poso Creek in Kern county, Valley Construction Co., San Jose, submitted a low bid of \$20,994.

The Kern bridge, which will be located about 12 miles north of Bakersfield, will consist of two 32-foot 6-inch spans and two 24-foot 6-inch spans on concrete pile bents.

#### Total bids were:

Valley Const. Co., San Jose	\$20,994.00
John Jerovich, Fresno	21,087.00
N. M. Ball Sons, Berkeley	22,306.60
Rexroth & Rexroth, Bakersfield	23,695.00

Shipments of electric industrial trucks and tractors totaled 912 units during the first six months of 1937, as compared to 539 units shipped during the same period in 1936, according to the monthly report of the Bureau of Census.

## \$252,000 WORK AT AIR DEPOT LET BY ARMY

MacDonald & Kahn, W. J.  
Tobin Win Sacramento  
Contracts

WASHINGTON, D. C., July 26. Award of two contracts aggregating \$252,330 for construction of buildings and appurtenances at the Sacramento Army Air Depot was announced today by the War Department.

To MacDonald & Kahn Co., Ltd., Financial Center Bldg., San Francisco, at \$221,917, went the contract for constructing an equipment repair building and operating office and engineering office buildings.

W. J. Tobin, 3701 Balfour avenue Oakland, was awarded the second contract at \$30,413. The work involves construction and completion of the sewage disposal plant and pumping station at the air depot.

### Eight Bidders

Bids on the job were opened July 18. Eight firms submitted proposals ranging from the low figure to \$39,928.56. The second lowest bidder was Fred J. Early, Jr., at \$31,960, followed by Eaton & Smith at \$24,500.

MacDonald & Kahn Co., Ltd., bid \$146,641 on the equipment repair building and \$77,777 on the operating office and engineering office buildings when bids were opened early this month.

On the same items Eaton and Smith, second lowest bidders, bid \$150,000 and \$32,500. The Azavedo Construction Company bid \$150,500 and \$87,936; and K. E. Parker bid \$151,800 and \$81,986.

The equipment repair building will be a two-story reinforced concrete structure. It will measure about 200 feet by 60 feet.

The remaining buildings will be two-story reinforced concrete annexes to the engineering shop. They will be about 40 by 87 feet in size.

## Alameda Firm Wins Hollister Hospital

HOLLISTER, July 23.—The San Benito county board of supervisors this morning awarded the contract for the construction of the new county hospital and almshouse to F. C. Stolte Co., 1405 San Antonio avenue, Alameda.

Amount of the contract price, according to County Clerk Elmer Dowdy, was \$72,392.

The Stolte Company submitted low bid for the work to the supervisors last week.

The building will be one-story in height, of reinforced concrete construction, and will be built around a central patio. Plans for the project were prepared by Architect Robert Stanton of Del Monte.

## SLIGHT DECLINE IN PRICE LEVEL

Average wholesale prices for building materials declined one-tenth of one per cent during the week ended July 17, according to the weekly price summary prepared by the U. S. Bureau of Labor Statistics. The drop, the bureau reported, was due to lower lumber prices.

Brick and tile prices were higher, as were those for paint materials. No changes were reported for structural steel and cement. The index for the week stood at 96.8 per cent of the 1926 level, according to the bureau.

## Security Board Summary Issued

The Social Security Board released yesterday a summary of progress as of July 1, 1937. This 4-page leaflet gives a concise picture of the status of the five programs administered by the Board under the Social Security Act and shows the progress made during the quarter ending June 30, 1937.

The summary indicates that account numbers had been assigned by the end of June. One hundred and seventy-one field offices, which now have the responsibility for assigning account numbers, had been opened by that date.

All the States, the Territories of Alaska and Hawaii, and the District of Columbia had enacted laws for unemployment compensation by June 30, and since that date, the Board has approved the two which were still unapproved at the close of the month.

Five plans for old-age assistance, four for aid to the blind, and six for aid to dependent children were approved by the Board during June. One plan for aid to dependent children had been approved previously during the quarter, and, since July 1, the Nevada plan for old-age assistance has been approved. Estimates of the Board, based on reports received during the past months, indicate that 1,867,100 needy individuals will receive cash payments during July in 47 States with one or more approved public assistance plans. Approximately 4,000,000 applications for social security accounts were received during the quarter, and that 29,954,821 social security accounts total does not include estimates for the recently approved Nevada plan and a plan for aid to the blind for which Federal funds have not been requested.

Shipments of hand fire extinguishers for the first five months of 1937 amounted to 214,324 units, a substantial gain over the total of 149,231 extinguishers shipped during the same period in 1936, the Bureau of Census reports.

## BUREAU OPENS BIDS ON TWO SHASTA JOBS

Sacramento, Portland Contractors Low on Grading, Bridge

Opened yesterday by District Engineer C. H. Sweetser of the Bureau of Public Roads were bids on two contracts for work in Shasta county aggregating \$303,777.90.

C. J. Montag, Portland, submitted the low bid of \$191,222 for construction of the Lake Britton Bridge on Section J of Route 77 on the Mt. Shasta-Mt. Lassen National Forest Highway.

Low bid for grading on the same section of the Mt. Shasta-Mt. Lassen National Forest Highway was submitted by A. Teichert and Son, Inc., of Sacramento, at \$112,555.90.

A. Teichert and Son, Inc. were the second lowest bidders on the bridge contract. Their figure was \$199,954.50. The third lowest bidder was the Wicks Engineering & Construction Co. of Des Moines, at \$203,660. Six firms submitted bids.

### Structural Steel

The construction of the Lake Britton Bridge involves 170,000 lbs. of reinforcing steel; 942,000 lbs. of structural steel; 1,578 cu. yds. of concrete, and various other items.

The second lowest bidder on the Shasta County grading job was E. L. Gates of Trail, Oregon, at \$114,662.50. Hemstreet & Bell of Marysville were the third lowest bidders at \$115,450.70. Bids were submitted by seven contractors.

The contract calls for about 5-133 miles of grading. Principle items included: 33.5 acres clearing and grubbing; 142,100 cu. yds. unclassified excavation; 15,000 cubic yards excavation for borrow; 23,260 lbs. reinforcing steel; and 1,878 lineal feet of corrugated galvanized sheet metal pipe.

## WALNUT ASSOCIATION ISSUES NEW BROCHURE

"Walnut in the Art of Gracious Living", a 19-page illustrated brochure on the uses of walnut in home furnishings has been published by the American Walnut Manufacturers Association, 616 S. Michigan boulevard, Chicago. Copies may be obtained without charge from the association.

The pamphlet contains many illustrations of homes furnished in walnut, as well as sections of various types of walnut. The characteristics of walnut, including its weight, hardness, strength and workability are described.

Motor vehicle registration in Alameda county last year totaled 173,895 vehicles, according to the annual report of Ray Engels, director of the State Department of Motor Vehicles.

## STATE OPENS BIDS IN L. A. ON ROAD JOBS

**Hollywood Bidder Low on Imperial Grading; L. A. Firms Bid Other Contracts**

LOS ANGELES, Aug. 5.—Low bids aggregating approximately \$211,000 were received at the office of the State Highway Engineer here today on four Southern California highway and bridge projects.

G. W. Ellis, 8240 Lankershim boulevard, Hollywood, at \$37,460 was low bidder for grading and surfacing about 9.4 miles in Imperial county, between Holtville and Brawley. Second low proposal was \$38,314, submitted by R. E. Hazard & Sons, San Diego.

For widening shoulders and surfacing on about six miles between West Covina and Pomona, Los Angeles county, Claude Fisher Co., Ltd., 2455 East Fifty-fifth street, Los Angeles, submitted a low bid of \$67,420, with George J. Boek Co., Los Angeles, bidding second at \$79,324.

### Ventura Bridge

J. E. Haddock, Ltd., 357 N. Chester avenue, Pasadena, was low at \$40,363 for constructing a reinforced concrete girder bridge across Big Sycamore Creek about 10 miles south of Oxnard, Ventura county. Second low bid was that of R. R. Bishop, Long Beach, at \$41,220.

With a proposal of \$16,836, Oswald Bros., 366 East Fifty-eighth street, Los Angeles, submitted low bid for applying road-mix surfacing to about 16.9 miles of shoulders in San Bernardino and Riverside counties. George Herz & Co., San Bernardino, was second at \$18,325.

### BOILER ORDERS GAIN

New orders for steel boilers taken during the first six months of 1937 totaled 5,091, a substantial gain over the total of 4,399 new orders taken during the same period in 1936, according to the monthly report of the Bureau of Census.

## UNION PAVING, PIAZZA & HUNTLEY, LESURE LOW ON HIGHWAY PROJECTS

SACRAMENTO, August 4.—The State Division of Highways today opened bids on three highways and bridge construction contracts aggregating \$143,351.00.

The contracts call for grading and paving in Solano county; surfacing in Kern county, and construction of a bridge in Monterey county.

The largest job involves grading and paving with Portland cement concrete and plant-mixed surfacing a section of roadway in the vicinity of Carquinez bridge. Union Paving Company, at \$70,737.70, submitted the low bid on the job.

### Other Bidders

Other bidders were: Frederickson and Westbrook, \$74,978; Bodenhammer Const. Co., \$75,948.50; A. Teichert and Son, \$77,184.90; A. J. Raichert, \$77,187.30; Macco Const. Co., \$81,717.50; Louis Biasotti and Sons, \$83,777.50; Frederickson and Watson Const. Co. and Frederickson Bros., \$86,313, and Charles L. Harney, \$81,314.10.

Piazza and Huntley, at \$40,790, submitted the low bid for surfacing eight miles of highway and constructing borders on two miles of roadway south of Greenfield in Kern county.

Other bidders were: Griffith Co., \$41,250; Independent Const. Co., Ltd., \$44,700; Union Paving Company, \$45,630, and L. A. Briscoe, \$53,482.

Principle items include: 11,000 tons of crusher run base; 40 tons of liquid asphalt (SC-1A); 22,000 square yards of asphaltic paint binder; 4,000 tons of mineral aggregate plant-mix surfacing; 445 tons of liquid asphalt of various types, and 29,000 square yards preparing, mixing and shaping shoulders.

### Mud Creek Bridge

Only two bids were submitted for construction of a steel and concrete bridge across Mud Creek, 25 miles north of San Simeon, consisting of one 80-foot plate girder span and two 41-foot steel beam spans. The work is located in Monterey County.

The low bidder was E. T. Lesure of Oakland, at \$31,824.40. A Soda & Son, also of Oakland, were the second low bidders, at \$33,321.40.

### TOWER FRAMING BIDS SCHEDULED

Bids for framing work in connection with the East towers for the 1939 Golden Gate International Exposition were invited yesterday by the San Francisco Bay Exposition Co. Proposals will be opened Aug. 18 at the exposition offices, 585 Bush street.

As with other recent exposition contracts, being financed without federal assistance, bids will be opened privately, officials indicated.

## Bridge Railway Work Progresses

With bids for the San Francisco viaduct of the Bay Bridge electric railway system scheduled to be opened August 18 and with construction started last week on the terminal building proper, work on the interurban system is well under way, according to the progress report of Chief Engineer C. H. Purcell filed yesterday with Director of Public Works Earl Lee Kelly.

Contracts already started include the \$1,400,000 railway signal and interlocking project, of which the General Railway Signal Company is the general contractor; and the substructure of the East Bay viaducts and yards comprising also the Port of Oakland Overhead, costing approximately \$700,000, contractors of which are Bates & Rogers Construction Company.

The contract for the San Francisco Viaduct (Contract No. R-3) were advertised last Friday, and call for the demolition and removal of remaining buildings on the site to be occupied by the viaduct. The work also involves 35,000 cubic yards of excavation.

## STATE PLANS NINE GRADE SEPARATIONS

Kelly Announces Approval of  
Jobs to Be Started by  
January 1

State Director of Public Works Earl Lee Kelly this week announced the approval of plans for construction of nine grade separation projects, aggregating \$1,637,000, by the U. S. Bureau of Public Roads.

Cost of projects will be borne by the Bureau of Public Roads, the State and various railroad companies.

Largest of the projects will be an underpass at the northerly limits of Livingston, Merced county. Federal funds to the amount of \$240,000 will be expended and the state will spend \$100,000 for grading and paving approaches involving 1.7 miles of roadway. Sodium vapor lights will be used to illuminate the underpass.

### Near San Jose

The second largest project is to be a subway north of San Jose costing approximately \$200,000. The project will provide a grade separation between the Milpitas and Niles branch of the Southern Pacific railroad and the new Bavshore highway.

The structure will consist of two openings 34 feet wide, each of which will accommodate three lanes of traffic. A concrete sidewalk five feet wide will be provided for pedestrians in each opening. The main part of the structure will carry the tracks of the S. P. railroad over the highway and will consist of two 77-foot 8-inch steel plate girder spans resting on reinforced concrete abutments and a reinforced concrete center pier.

### Pinole Overhead

At Pinole an overhead will be constructed costing \$185,000. Of this sum, \$50,000 will be contributed by the State and \$135,000 by the A. T. & S. F. railway. The existing highway through Pinole now passes over the tunnel of the railroad. Since the tunnel needs reconstructing the railway company believes that it will be cheaper to construct an open cut thus making an overhead structure necessary. The structure will accommodate four lanes of traffic.

Other grade separation projects slated are:

**SAN LUIS OBISPO.** An overhead crossing six miles north of San Luis Obispo, costing \$110,000.

### Redding Underpass

**REDDING.** An underpass south of Redding to replace the present structure which is considered too narrow, costing \$200,000.

**LOS ANGELES COUNTY.** A subway on Lankershim boulevard at Hewitt station, costing \$240,000.

In addition there will be three grade separation structures constructed on the new Altamont Pass road, connecting Oakland, Liver-

## Vertical Shaft Pump Research . Work Initiated

The Department of Mechanical Engineering at the University of California has established a laboratory for the study of vertical-shaft pumps. The program of research has been worked out in cooperation with the Division of Agricultural Engineering and the Division of Irrigation Investigations and Practice of the College of Agriculture and with the pump manufacturers. The work of this laboratory will include:

1. Research in the field of deep-well and propeller pumps.

2. Analysis of laboratory and field methods of testing, development of testing standards and calibration of testing instruments.

3. Tests of motors, bearings and auxiliary equipment.

3. Tests of motors, bearings and auxiliary equipment.

4. Tests of manufacturers' types.

5. Acceptance tests of specific pumps.

Installation of the testing equipment has been completed and work was started last month. Initial projects are:

Accuracy of Methods of Measuring Water;

Normal Characteristics of New Deepwell Pumps;

Friction Losses in Riser Columns; Friction in Bearings;

Effect of Wear on Pump Characteristics;

Pump Thrust Loads; Development of Pump Testing Code.

Arrangements have been made to borrow pumps and accessories for carrying out this program. Manufacturers interested in participating in this work should write to Professor M. P. O'Brien, Department of Mechanical Engineering, University of California, Berkeley.

## CRANE ANNOUNCES GUN-TYPE BURNER

Lynn G. Lindsay, manager of the heating section of Crane Company, Chicago, announces the marketing of a gun-type oil burner, called the Crano Burner, designed for use on conversion jobs or complete new boiler-burner units.

more, Tracy and Stockton. The total cost of the projects is estimated at \$362,000.

An overhead will be constructed at Greenville, three miles east of Livermore and an overpass at Redmond which is about six miles east of Livermore.

The present program includes construction slated for this year only. Bids on all projects are expected to be called this autumn. Actual work on the projects will be started as soon as possible, according to Director Earl Lee Kelly.

## JULY BUILDING VOLUME STEADY BUREAU REPORTS

Terminal Boosts Total to New  
High for Year; Frame  
Permits Drop

Issuance of a permit for the \$2,283,377 San Francisco-Oakland Bay Bridge Railway Terminal boosted the San Francisco building permit total for July to a new 1937 high of \$3,382,962, according to figures released Saturday by Chief Clerk S. J. Rosenblum of the Central Permit Bureau.

This month's total showed a substantial gain over the July, 1936 figure of \$2,573,209.

Gains were made during July in alterations and Class C construction. The total for Class C construction permits was \$254,200, as against \$90,500 for the same type of construction in July, 1936. The 1937 alteration total was \$306,343, compared with \$219,621 for July, 1936.

### Frame Total Low

A drop was recorded in frame construction with its 115 permits issued this July for structures estimated to cost \$495,545, as against 170 permits issued in July, 1936 for construction costing \$820,408.

Following is a classification of permit figures for July, 1937 and July, 1936:

Class	July, 1937 No. Est. Cost	July, 1936 No. Est. Cost

## Registration Gains Reported by Ingels

SACRAMENTO, August 4.—Increases of 95.63 per cent and 63.24 per cent, respectively, in the number of trailer and motorcycle dealers in California in the first six months of 1937 as compared with last year were reported by the State Motor Vehicle Department in its monthly report to Governor F. E. Merriam.

Up to the first of July this year, the report said, 413 trailer dealers had been licensed, while for the same period last year the number was only 211. Motorcycle dealers licensed for the first half of 1936 were sixty-eight, while so far this year licenses have been issued to 111.

Automobile dealers licensed to July 1, increased 9.70 per cent, the report said, jumping from 3,691 to 4,049.

### MATERIAL PRICE LEVEL UNCHANGED

Average wholesale prices for building materials remained steady during the week ended July 24, according to the weekly survey prepared by the U. S. Bureau of Labor Statistics. The index for the group stood, as in the preceding week, at 96.8 per cent of the 1926 level.

Prices for lumber declined an average of 0.2 per cent, while a decrease of 0.1 per cent was recorded for the paint materials sub-group, the bureau reported.

Brick and tile, cement and structural steel prices showed no change.

## COULEE BRIDGE IS COMPLETED, PAGE REPORTS

Span Will Be Absorbed by  
Dam As Concrete Pour-  
ing Progresses

A steel bridge, 3,000 feet long and 175 feet high, has been completed across the Columbia River at Grand Coulee Dam, John C. Page, Commissioner of Reclamation, reported this week to Secretary of Interior Harold L. Ickes.

This bridge is unique in that within six months it will have disappeared, having been imbedded in the concrete of the growing dam and thus swallowed up by the project.

Three standard gauge railroad tracks cross the bridge, which extends from the two great concrete mixing plants located at the west and east abutments. It is one of the busiest bridges in the world, since a relay of trains are moving back and forth across it continuously across it hauling concrete in 4-cubic yard buckets for placement in the dam. Already nearly 6,000,000 tons of concrete has been handled by cranes which move about on the bridge to serve the workmen far below.

### \$500,000 Project

The bridge contains 7,000 tons of steel and cost more than half a million dollars. Despite the fact that burying such a structure in the concrete of the dam would appear to be a loss, it is the most efficient means devised, and less expensive than any other method proposed for placing the enormous yardage of concrete required over the foundation area 500 feet wide and 3,000 feet long.

From the high bridge cranes swing buckets loaded with 11 tons of concrete to any point within a strip 125 feet wide across the river. A second and lower bridge, which has not as yet been completed, will cover the remainder of the foundation area. The lower bridge also will be "swallowed up" as the dam grows.

## Large Material Shipments Via Railroads Traced in PWA Indirect Labor Analysis

Following up its analysis of the indirect labor created behind the lines by PWA projects, the Bureau of Labor Statistics of the United States Department of Labor last week reported to Public Works Administrator Harold L. Ickes the results of its measurement of rail transportation of materials originating because of PWA construction.

Railroad records were carefully checked against material orders

maintained on projects, and a detailed study of freight movements was undertaken. Statistics were obtained from the Bureau of Railway Economics of the Association of American Railroads. Data of the Interstate Commerce Commission and the Federal Coordinator of Transportation were thoroughly reviewed.

Construction materials going to PWA projects were traced from source to delivery, and a thorough analysis made of the equipment necessary to transport them.

The study involved research never before undertaken and isolated railroad labor and operating requirements necessary to handle the construction program. No comparable data, it was found, ever had been evolved to demonstrate clearly the far-reaching effect of a Public Works program in creating indirect labor created by the transportation of materials. Somewhat similar studies had been undertaken by the Bureau of Labor Statistics in the production of steel, cement and lumber, and the general overall ratio of indirect work created by PWA had been established. (This was found to be 2.5 indirect labor for 1 of direct labor.)

### 172,000,000 Tons Moved

The Bureau's railroad report was delivered by it to Public Works Administrator Ickes Saturday. The Bureau reported that transportation of PWA materials and the necessary supply of equipment for railroads to handle the movement created 105,000,000 man-hours of labor. It involved the use of 3,650,000 freight cars to haul the material, and created 620,000,000 freight-train-car miles. A total of 172,000,000 tons of materials was moved, and .608 man-hours of work per ton of freight was created.

The Association of American Railroads said that the figures determined by the Bureau of Labor Statistics meant that:

The 172,000,000 tons of construction material shipped for PWA projects is greater than the total tonnage of commercial freight passing through the Panama Canal in seven years from 1930 to 1936 inclusive. It is the equivalent of 11-3 tons of freight for each man, woman and child in the United States, and provided an average of .86 hours of work per inhabitant.

The 620,000,000 freight-train-car miles of transportation of PWA materials is the equivalent of one freight car in continuous motion for a period of 4,480 years, at average freight train speed. In other words, a freight car starting its

journey about 2,500 B. C., and in constant movement down through the ages 24 hours a day, would complete its journey of 620,000,000 miles about the year 1980 A. D.

The PWA freight movement was the equal of 1,000 freight cars travelling around the world at the equator 25 times.

The 3,650,000 freight cars needed to transport PWA materials would make a train 30,417 miles long. It would encircle the globe at the waistline one and a fifth time.

The cars used is also the equivalent of loading twice during the 1933-36 period all the freight cars owned by Class I railroads in the United States.

The railroad employment created by PWA (not including that needed for loading and unloading cars) was the equivalent of a full year's work for 45,833 men, using railroad employment averages.

As the 1936 average railroad wage rate of 69.1 cents per hour, the figure represents an aggregate compensation of \$76,010,000 going to railroad workers because of PWA transportation.

### \$1,592,000,000 Materials

The Bureau of Labor Statistics found that \$1,592,000,000 worth of material orders had been placed for PWA projects. Building materials included such items as lumber, shingles and lath, cast-iron pipe and fittings, explosives, iron and steel pipe, petroleum, nails and wire, rails and fastenings, finished iron and steel products, bituminous coal, building brick and tile, cement, stone, gravel and sand. The average haul for these projects ranged from 72.1 miles for sand and gravel (the shortest distance) to 768.1 miles for lumber (the longest). Cast-iron pipe and fittings moved an average of 592.5 miles and iron and steel pipe moved the third longest, 513.8 miles. Finished iron and steel products had an average haul of 342.4 miles while building tile moved 331.6 miles.

### COPPER IN HOMES, THEME OF BOOKLET

"Portrait of a Rust-Proof Home" is the title of an illustrated booklet published recently by the American Brass Co., Waterbury, Conn., with local offices at 235 Montgomery St., San Francisco. Illustrated with numerous photographs, the brochure demonstrates many uses for copper and copper alloys in residential construction.

## STATE INVITES BIDS ON THREE ROAD CONT'CTS

Bids on Two Bridges, One  
Oil Job Open August  
25th-26th

(Special to Daily Pacific Builder)  
SACRAMENTO, Aug. 3.—State Division of Highways today issued three calls for bids for bridge and highway construction estimated to cost approximately \$400,000, according to figures set up in the 1937-38 State Highway budget.

Two of the jobs are located in San Bernardino county and one in Monterey county.

Largest of the contracts authorized for advertising today calls for construction of a reinforced concrete girder bridge across the Salinas River at Soledad, Monterey county. Bids will be opened in Sacramento August 25.

### Fifteen Spans

The bridge will consist of thirteen 104-foot spans and two 89-foot spans on concrete piers and abutments on pile foundations.

The Monterey county bridge, together with grading and paving of an additional three-quarters of a mile not included in the current contract, were lumped together in the biennial budget, with about \$415,000 earmarked for the whole project.

The following day, August 26, the State Highway Engineer's office in Los Angeles will open bids on two jobs located in San Bernardino county.

One calls for construction of a reinforced concrete slab bridge across Cable Creek, seven miles north of San Bernardino.

### Surfacing Approaches

The bridge will consist of two 21-foot spans and one 24-foot span on concrete bents. The contract also includes grading and surfacing about two-tenths of a mile of approaches.

The second contract involves application of seal coat to existing pavement on about 82.4 miles of highway between Amboy and Essex and between Vidal and Needles in San Bernardino county.

Work will require about 670 tons of liquid asphalt, Type SC-4; 1870 cubic yards of sand, and 53.7 miles cover material.

## G-E REPORTS 43% SALES INCREASE

Sales billed by General Electric Company during the first 6 months of 1937 amounted to \$171,076,645, compared with \$119,273,388 during the corresponding period of 1936, an increase of 43 per cent. President Gerard Swope announced this week.

Profit available for dividends for the first six months this year amounted to \$26,293,004, compared with \$16,592,324 for the first six months last year, an increase of 58 per cent.

## OPEN L. A. GRADE SEPARATION BIDS

LOS ANGELES, Aug. 4.—Person & Hollingsworth Co., 507 South Lorena street, Los Angeles, today submitted the lowest bid to the Los Angeles Board of Public Works for constructing a grade separation structure in Vignes, Bauchet and Avila streets at the Union Passenger Terminal. Amount of the low proposal was \$152,198.00.

Second low bidder for the contract was Charles J. Dorfman, Los Angeles, at \$153,833.

The project is being financed in part by a grant from the Federal Public Works Administration.

## PWA Lists Profit At \$11,326,000 On Sale of Bonds

A report to Administrator Harold L. Ickes by Charles J. Maxey, chief accountant, yesterday revealed that the Federal Government had profited \$11,326,385 through the sale of bonds accepted as security for Public Works Administration loans to municipalities.

This is in addition to the \$20,648,798 turned into the Federal Treasury as interest collected from the borrowing cities, states and counties which volunteered to build permanent and useful public works to create jobs at the site of construction as well as "behind the lines."

The "new high" in PWA bond sales profits resulted largely from the consummation of the contract whereby the firm of Dillon, Read and Company of New York City purchased the balance of bonds of the Triborough Bridge Authority through the Reconstruction Finance Corporation which acts as PWA's broker.

### \$840,000 Profit

The New York brokers purchased \$28,000,000's worth of bonds at 102, making a profit to the Federal Government on that transaction alone of \$840,000.

Through July 27, 1937, the Public Works Administration had purchased a total of \$642,598,596 in municipal bonds. It had placed bonds with the par value of \$488,812,509 with the RFC and retired or sold or cancelled \$14,693,343's worth of bonds, leaving bonds on hand with a par value of \$128,082,743.

The sale of the bonds, accepted at par by PWA when the securities were going begging on the open market, have resulted in an average profit of about \$27.69 per thousand. As a result of the rapid sales during the past couple of years, RFC now holds only \$87,759,590's worth of bonds delivered to it by PWA.

## BOULDER INTERIM POWER CONTRACT YIELDS \$750,000

Secretary Ickes Signs Three-  
Year Contract With  
Corporation

Boulder Dam will contribute an unexpected three-quarters of a million dollars to the United States Treasury during the next three years as a result of an interim power contract approved this week, Secretary of the Interior Harold L. Ickes announced yesterday.

This sum is but one item in the revenues the dam has started to pour back into the U. S. Treasury, insuring complete repayment to the Government for its investment in Boulder Dam plus 4 per cent interest in the next 50 years.

The Bureau of Reclamation has been authorized to negotiate a contract with the Nevada-California Electric Corporation, the draft of which also has been approved by the utility company, under which the company would begin purchasing Boulder Dam power immediately. The company, one of the original Boulder Dam power purchasers, was not required to take and pay for power under the contracts negotiated in 1930 until 1940. The Department of the Interior, however, managed to complete the great public work and get it on a revenue-producing basis several years ahead of schedule.

Under the interim agreement the power generated by unit A-8 in the Arizona wing of the power house would be sold to the utility company. This unit, which has a capacity of 40,000 k.v.a., has been installed and is ready for operation.

Recently the company applied to the Bureau of Reclamation for permission to buy power at once for the demand for Boulder Dam's benefits exceeded estimates. The growth of the power market in Southern California, which has exceeded expectations, and the record-breaking completion of Boulder Dam ahead of the original schedule, make possible the sale of this power at this time.

The Bureau of Reclamation estimates that by advancing three years the time when the company's contract would have become effective revenue to the government totaling \$793,058 will be added to the income from Boulder Dam.

## WESTINGHOUSE LISTS CABINET DISHWASHER

A new cabinet-type electric dish washer, combining the electric dishwasher, sink basin and work surfaces in a single unit has been developed recently by the Westinghouse Electric and Manufacturing Company, the company announces. Said to occupy no more space than any standard kitchen sink and drain board, the cabinet dishwasher is adaptable for all shapes and sizes of kitchens.

## GILES LOW ON S. F. COTTAGES AT MOCCASIN

**Stockton Bidder Submits Bid  
of \$73,684 for Utilities  
Commission Job**

S. C. Giles, Stockton, at \$73,684 submitted the low bid to the San Francisco Public Utilities Commission yesterday for construction of nine cottages and appurtenant structures at Moccasin and Priest in Tuolumne county.

Four bids were submitted, ranging from the low figure to \$99,798.

The contract calls for construction of one cottage at Priest and eight cottages at Moccasin. All dwellings are to be of timber frame construction with concrete foundations, stucco exteriors and plaster interiors.

### Garage Building

Other structures involved are: one 7-car garage building with concrete apron; addition to store building at Moccasin; single woodshed; three double woodsheds, and one water supply unit for cottage and garage building. Bids were taken under nine units for single structures and groups of structures but all work will be awarded under one contract.

Other bidders were: Cotner, Tomnitz and King, \$86,564.03; W. C. Tait Company, \$96,700; and Fred J. Early, Jr., \$99,798. The Public Utilities Commission will have its first opportunity to award the contract for the job next Monday at its regular semi-monthly meeting.

The Commission opened bids also on a contract for laying 8-in. cast iron mains in Harrison and Sixteenth streets, from Fifteenth to Bryant street.

### Treacy Low Bidder

E. J. Treacy, at \$1,463.80, submitted the low bid for the job, followed by the Fay Improvement Company, at \$1,596.90. Lowrie Paving Company was third lowest bidder, at \$2,203.50, with the San Francisco Water Department submitting the high bid of \$2,544.40.

At the regular meeting of the Department of Public Works Director William H. Worden opened bids on two jobs. No bids were submitted for cleaning 96 yards of linoleum at the Main Library. Bids will be opened on the same job August 11.

Bras & Kuhn Company, at \$2,644, submitted the low bid to Director Worden for general construction of alterations to Room 479 at the City Hall. Other bidders were: Bureau of Building Repair, \$2910; Fink & Schindler Co., \$3311, and Peter Sartorio, \$3374.

### Welding Contract

The Ocean Shore Iron Works submitted the only bid for welding two three-sixteenth-inch steel rings on the inside of boiler heads, and furnishing two 4-inch by 6-inch handhole plates with guards, bolts and gaskets at the High School of Commerce. The figure was \$41.20.

## Lumber Industry Group for 1939 Fair Appointed

Twelve leaders in the San Francisco bay district lumber industry have accepted appointment to the Lumber Industry Participation subcommittee of the Golden Gate International Exposition for 1939. Dwight O'Dell of the California Redwood Association is chairman of the group.

Members of the committee will serve under the general direction of Ted Huggins, chairman of the Exposition Promotion Committee, seeking to promote the fullest possible participation and cooperation by all branches of the industry in promoting the exposition. Included in its membership are representatives of the National Lumber Manufacturers Assn., West Coast Lumbermen's Assn., Western Pine Association, California Redwood Association, plywood manufacturers, timber engineering organizations, wholesale and retail lumber dealers' groups of San Francisco and the East Bay and lumber trade publications.

Plans are already under way for a great western lumbermen's conclave in San Francisco and Oakland during the Exposition and the lumbermen will seek to have at least one day for the Exposition program set aside as "Lumber Day." Lumber industry exhibits will also be considered by the committee, with cooperative efforts to encourage the fullest use of Exposition facilities.

### Members of Committee

The committee membership follows:

Chairman: J. D. O'Dell, California Redwood Association.

Members: C. C. Stibich, Tahoe Sugar Pine Company, representing Western Pine Association; George R. Kendrick, Chas. R. McCormick Lumber Co., representing West Coast Lumbermen's Association; Homer Maris, Maris Plywood Co., representing The Plywood Industry.

J. E. Mackie, West Coast Manager, National Lumber Manufacturers Assn.; Jack Horner, Manager, Western Timber Structures, Inc.; Gus Russell, Santa Fe Lumber Co., representing San Francisco Lumber Wholesalers; Matt Harris, Van Arsdale-Harris Lumber Co., representing San Francisco Retail Lumber Dealers.

Clement Fraser, Loop Lumber Company, Alameda, representing East Bay Lumber Dealers; C. W. Bahr, President, California Redwood Assn.; Geo. H. Cornwall, The Timberman; San Hawkins, West Coast Lumberman; W. T. Black, California Lumber Merchant, representing Lumber Trade Publications.

New orders for steel boilers during June, 1937, totaled 832, as against 524 orders in June, 1935, the Bureau of Census reports.

## PORTLAND FIRM LOW ON MODOC POWER PROJECT

**Parker-Schram Bids Transmission  
Line for Surprise Valley  
Cooperative**

(Special to Daily Pacific Builder)

ALTURAS, August 3.—Parker-Schram Co., Couch building, Portland, yesterday submitted the low bid to the Surprise Valley Electrification Cooperative here for constructing about 350 miles of rural transmission lines in Lassen and Modoc counties, it was announced this morning.

Bids were submitted late Monday in unit price only, and the official tabulation of total bids was not completed until today, Chief Engineer Allan Sickler said.

Low proposal of the Parker-Schram Co. was \$384,252, using aluminum conductor. With copper-weld conductor, the firm figured the contract at \$405,382.

### Ziebarth Second

Fritz Ziebarth of Long Beach was second low bidder, Mr. Sickler said, bidding \$410,038 for aluminum conductor and \$418,089 for copper-weld conductor.

Third low proposal was submitted by Alta Electric & Mechanical Co., San Francisco, at \$412,739 for aluminum conductor and \$417,750 for copper-weld conductor.

The Surprise Valley cooperative was organized last year to qualify for assistance from the federal Rural Electrification Administration. Funds totaling approximately \$410,000 have been allotted the project by REA.

Announcement of the transmission line contract award probably will be made this week. Remaining to be advertised for bids is a contract for construction of a diesel electric power plant near Alturas.

## NAME WESTINGHOUSE CONSTRUCTION HEAD

Mr. I. F. A. Mitchell has recently been appointed to head the Construction Industry Section for the Westinghouse Electric & Manufacturing Company. Formerly assistant manager of sales for the Canadian Westinghouse Company, Mr. Mitchell has wide experience in the selection and application of electrical equipment in all industries, including the construction field. In his new position he will be responsible for making the facilities and engineering services for the company available to the entire construction field, including contractors and the company's

Shipments of steel lockers amounted to \$1,588,049 during the first five months of 1937, a gain of more than one million dollars over the value of shipments during the same period in 1936, which totaled \$833,206, the Bureau of Census reports.

## \$2,790,875 BID ON NAVY YARD GRAVING DOCK

Pacific Bridge Co. Second Low  
With \$2,983,000  
Proposal

WASHINGTON, D. C., Aug. 11.—George Pollock Co., P. O. Box 903, Sacramento, today submitted to the Navy Department here the lowest bid on all four proposals for construction of the new graving drydock at Mare Island Navy Yard.

The Sacramento contractor's low proposal for the complete project was \$2,790,875.

Second lowest bidder for the work complete was Pacific Bridge Co., San Francisco, at \$2,983,000. Siems-Helmets, Inc., and Johnson-Drake-Piper, Inc., Minneapolis, Minn., at \$3,044,000 submitted the third low bid.

### Reinforced Concrete

One of the largest single public contracts of the year in California, the drydock will be 700 feet long, 114 feet wide and 40 feet over all in depth. It will be of reinforced concrete construction.

The big drydock will be of the cruiser type, capable of docking ships of the 10,000-ton cruiser class.

It will rest on pile foundations. Work includes quay walls at the dock entrance, crane tracks, pump well, capstan and bollard foundations, manholes, culverts, drain piping, railings, wood floor and dock fittings.

Bids received today were well within the announced estimated cost of \$3,500,000.

## HENRY C. SMITH IN NEW QUARTERS

Offices of Architect Henry C. Smith of San Francisco have been removed from 785 Market street to 3867 Sacramento street, it is announced. The new telephone number is Skyline 2808.

Secondary Northern California highways will receive approximately \$5,591,000 of the budgeted state highway funds during the current biennium.

## \$400,000 OFFICERS' QUARTERS AT DEPOT ADVERTISED; BIDS SEPT. 9

SACRAMENTO, August 11.—Bids for construction of a group of buildings to cost in the neighborhood of \$400,000 were invited here today by the office of Major Arthur W. Parker, Constructing Quartermaster for the Army's \$7,000,000 Sacramento air depot.

Proposals will be opened Sept. 9 at the air depot, it was announced.

Four separate groups of buildings, quarters for officers and non-commissioned officers to be stationed at the depot, will be constructed under the contract advertised for bids today.

### Officers' Mess

Largest of the group will be the bachelor officers' quarters and officers' mess, to cost approximately \$130,000.

Eight double non-commissioned officers' quarters, cost of which is estimated at approximately \$120,000, form the second largest group.

Four double company officers' quarters will cost about \$100,000, it is anticipated.

The fourth group comprises six field officers' quarters, including one alternate type "B" quarters, and will cost about \$85,000.

All quarters will be of reinforced concrete construction and will conform architecturally with the design for other buildings at the depot. Plans were prepared in the office of the Quartermaster General in Washington, D. C.

Contractors desiring to figure the project may obtain plans and specifications from the office of the Constructing Quartermaster at the depot upon deposit of a certified check in the amount of \$50, payable to the Treasurer of the United States.

## RADIATOR BULLETIN PUBLISHED BY ARCO

An illustrated circular, "Heat from Corto Radiators," is a recent publication of the American Radiator & Standard Sanitary Corp., 40 West Fortieth St., New York City. Punched for inclusion in a catalog file, the brochure carries photographs of several decorative installations, as well as specifications, dimensions and ratings. Copies may be obtained by writing the corporation at the above address.

## BOARD APPROVES CAHILL SUBWAY BOND PROPOSAL

San Francisco Project Placed  
On November Ballot  
By Supervisors

Utilities Manager Cahill's \$49,250,000 rapid transit bond issue proposal will appear on the November 2 ballot in San Francisco.

The Board of Supervisors yesterday, by a vote of 8 to 3, passed a resolution which placed the rapid transit subway proposal in the hands of the voters.

The action followed the defeat of Supervisor Roncovieri's resolution calling for a bond issue of \$51,000,000 to finance construction of rapid transit facilities. The \$51,000,000 figure included \$1,750,000 to aid in financing interest during construction. Supervisor Roncovieri has consistently advocated including funds for interest during construction in all bond issue proposals.

Backing Mr. Roncovieri were Supervisors Shannon and Mead, both of whom voted in the affirmative.

Those in favor of the \$49,250,000 bond issue proposal were: Supervisors Brown, Colman, McSheehy, Moad, Meyer, Ratto, Reilly, and Schmidt. Supervisors Shannon, Roncovieri and Uhl voted against the measure.

The affirmative votes by Supervisors Brown and McSheehy came as a surprise since both have voted down the resolution on previous ballots. Supervisors Shannon and Roncovieri, both members of the Board's finance committee, were pledged to vote together since both had taken a stand against excluding funds for interest during construction at meetings of the committee, it was reported.

## EATON & SMITH WIN BAY SPAN VIADUCT AWARD

Heavily Lets Big Contract Day  
After Opening of  
Proposals

SACRAMENTO, Aug. 19. — Director Earl Lee Kelly of the State Department of Public Works today announced award of the contract for construction of the San Francisco-Oakland Bay Bridge railway viaduct to Eaton & Smith of San Francisco, at the bid price of \$605,000.

The contract calls for construction of a viaduct to carry the electric interurban trains of the Key System, Sacramento Northern and Southern Pacific from the bridge terminal now being constructed by MacDonald & Kahn Co., Ltd., to a bridge structure.

It is one of the last contracts for major San Francisco-Oakland bridge jobs to be let, and is the largest bay bridge contract to be awarded since the terminal building contract was let.

### Other Bidders

Other bidders on the viaduct were Bates & Rogers, \$651,507; Clinton Construction Co., \$670,854; Healy-Libbitts Construction Co., \$702,505; Barrett & Hilp and A. Teichert & Son, \$712,705; and MacDonald and Kahn Co., Ltd., \$733,337.

As figures indicate, Eaton and Smith's proposal of \$605,350 was more than \$46,000 lower than the figure submitted by the second lowest bidder.

Eaton and Smith's bid of \$15.30 per cubic yard on one of the major spans involving 12,500 cubic yards of concrete above foundations was more than \$4 per cubic yard lower than the second lowest bidder. Their bids for demolition and removal of buildings, and drainage were substantially lower than the prices of other bidders, also.

Shipments of fire extinguishing motor apparatus during the first six months of 1937 totaled 419, as compared to 289 units shipped during the same period in 1936, the Bureau of Census reports.

## CLINTON, ANDERSON & ROWE LOW ON RICHMOND-SUNSET TREATMENT PLANT

Clinton Construction Company and Anderson & Rowe yesterday submitted low bids to Director William H. Worden of the San Francisco Department of Public Works on the structural and mechanical work propositions, respectively, for construction of the \$435,000 Richmond-Sunset Sewage Treatment Plant.

### EXPOSITION ASKS SPUR TRACK BIDS

Bids for construction of spur track and switching facilities on Yerba Buena Shoals, site of the 1939 Golden Gate International Exposition, will be opened at the exposition company offices in San Francisco Aug. 27, it was announced this week.

Work will involve about 8,055 feet of track, with an alternate proposal providing for construction of an additional 3,032 feet of track. Contractors desiring to figure the project may procure plans at the exposition office, 525 Bush street, upon deposit of \$20.

No bids were submitted under Proposition C which called for construction of the entire plant, including structural and mechanical work.

Clinton Construction Company bid \$262,500 on the proposition involving structural work. Second lowest bidder was Eaton & Smith, at \$278,600. Other bidders were: Barrett & Hilp, at \$294,000; MacDonald & Kahn Co., Ltd., at \$298,892; and Fred J. Early, Jr., and C. W. Caletti & Co., bidding jointly, at \$335,515.

### Mechanical Work

The bid of Anderson & Rowe on Proposition B (mechanical work) amounted to \$172,889. The Kenny Electric Company, at \$189,700, was the second lowest bidder, followed by Fred J. Early, Jr., at \$195,663; and Herman Lawson Company, at \$198,833.

The combined bid of Clinton Construction Company and Anderson & Rowe for the entire job amounted to \$435,389.

The second largest job for which bids were opened yesterday by Director Worden involved construction of the Castro Street Extension from Duboce avenue to Walter and Divisadero streets.

Charles L. Harney, at \$45,792.50, submitted the low bid which was considered lower than the estimated cost of more than \$50,000. Second lowest bidder was Eaton and Smith, at \$46,137.75.

Other bidders were: A. G. Raich at \$46,945.90; M. J. Lynch, \$48,145.50; Fay Improvement Co., \$49,234.40; Sibley Grading and Teaming Company, \$49,858.10; and E. J. Treacy, \$56,599.50.

While digging up palm trees near the famed Mission Dolores in San Francisco, workmen in the horticultural department of the 1939 Golden Gate International Exposition unearthed dozens of skulls, apparently from an old Indian burial ground.

### "CECO" ANNOUNCES CHANGE OF NAME

The name of the Concrete Engineering Co. has been changed to Ceco Steel Products Corp., it is announced by Pres. C. Louis Meyer. The more descriptive title was made necessary by expansion of services and products of the organization, he said.

General offices will continue to be located in Omaha, with branch sales offices and warehouses in principal cities. San Francisco and Los Angeles are locations of the West Coast branch offices, according to R. N. Jennings, San Francisco credit manager. The local office is at 1280 Indiana street.

Ceco products now include steel joists, steel windows, metal frame screens, metal window strips and metal lathing materials, as well as reinforcing steel and welded wire fabric, patented steel forms and adjustable shores and column clamps.

## SEVEN SCHOOLS IN CALIFORNIA WIN ALLOTMENTS

Included in "Fire Hazard" Group Approved to Start New PWA Program

Grants to seven California schools to aid construction estimated to cost \$1,113,769 were included among 280 allotments for school construction work in 41 states approved yesterday in Washington, PWA Administrator Harold L. Ickes announced.

The 280 allotments total \$18,033,458. The total cost of school construction for which grants were made amounts to approximately \$37,714,378.

The following list represents the first survey of all so-called fire hazard school applications, preference having been given to applications calling for demolition of the old school building or buildings in this first group of allotments made under the authority granted by Congress June 29.

The following list includes allotments for western projects, only.

## U. C. CONCRETE DESIGN COURSES START SEPT. 13

Richardson Announces Extension Classes to Be Held In San Francisco

The University of California Extension Division has scheduled four courses in concrete construction, according to Prof. Leon J. Richardson, Director.

The courses will be taught by Victor E. Johnson of Oakland, and will be given at the Extension Division's San Francisco center, 540 Powell street. Titles of the courses and beginning dates are as follows:

**Reinforced Concrete Design:** for architects, engineers and draftsmen. Application of theory, practical designing and detailing stressed. Monday, Sept. 13, 7 P. M.

**Reinforced Concrete: Design of Formwork:** economical design and construction of formwork; technique and craftsmanship of form construction for architectural concrete buildings. Monday, Sept. 13, 8 P. M.

**Reinforced Conc.: Rigid Frames:** detailed analysis of rigid frame concrete bridges of one or two spans. Friday, Sept. 17, 7 P. M.

**Reinforced Concrete: Continuous Beams:** moment and shear distribution for prismatic beams and beams of varying section; the column analogy. Design of rigid frames with and without sideways. Friday, Sept. 17, 8 P. M.

Enrollment fee for each course, 15 meetings, is \$6.00 plus \$1.00 annual registration fee, covering all courses taken during 1937-38. First meetings of all classes will be open to the public without charge, according to Professor Richardson.

## TRAINING SCHOOL CLASSES PLANNED

## FRIANT BRANCH OFFICE OPENED, YOUNG REPORTS

Canal Survey Work Speeded; New Office Serves As Field Headquarters

A branch office of the Friant Division of the Central Valley Project was occupied yesterday by the United States Bureau of Reclamation in Visalia, county seat of Tulare county, Construction Engineer Walker R. Young reported.

Located on the second floor of the Visalia City Hall, it will serve as a local office for field work on the Friant-Kern Canal. The division headquarters is located at Friant, northeast of Fresno, in charge of Division Engineer R. S. Candler.

Final survey of the canal line has been completed from Friant to the Kings River crossing east of Centerville, Fresno county. Preliminary location has been extended to near Oroqui, Tulare county.

The canal when completed will carry supplemental irrigation water to Southern San Joaquin Valley lands now threatened with reversion to desert because of depletion of the underground water supply.

A branch office of the Delta Division was opened recently in Tracy San Joaquin county, to facilitate survey work on the San Joaquin Pumping System. The Delta Division headquarters is at Antioch, Contra Costa County, in charge of Division Engineer Oscar G. Boden.

Headquarters of the Kennett Division is at Redding, Shasta county, in charge of Division Engineer Roy M. Snell. All the division engineers report to Walker R. Young, construction engineer, at the project headquarters in Sacramento.

## MALLEABLE CASTING PRODUCTION GAINS

Production of malleable iron castings has shown a decided increase during the past four years with production totaling 665,000 tons in 1936, and operations reported at 73 per cent of capacity for the first half of 1937, according to Melott & Snyder, public relations agents for the industry.

The later figure is 16 points higher than the percentage of capacity (57 per cent) reported by mills for the first six months of 1936.

Mill executives state that new uses for malleable iron castings are being developed regularly. They are found in automobiles, office homes; on farms, railroads, ship and airplanes. Lamp posts, bridge railings, park bench frames, fence posts and various types of agricultural tools represent new adaptations.

More than 3,000 special events are being arranged for the 1938 Golden Gate International Exposition, an average of more than ten a day for the 288 days.

Where Cable  
MUST be TOUGH

WHEN this loader goes into action, so, too, does the cable. Cars bang in and out, and the cable gets under the wheels . . . under the ever-moving coal . . . under the tractor tread of the loader . . . even on top of the cars. Severe service!

Yet, aside from a few nicks, this G-E tellurium-rubber cable was in good shape — showed no sign of wear.

Give tellurium cable a trial on any of your portable equipment. It's really tough stuff and will give you the best of service. See your G-E jobber, or address nearest G-E sales office, General Electric, Connecticut, N. Y.

## BIDS SEPT. 15 FOR OVERPASS AT GREENVILLE

### State Authorizes Three Divisions of Highways Contracts For Advertising

SACRAMENTO, Aug. 24.—Three contracts for work on California state highways were authorized for advertising today by the State Highway Commission, with bids scheduled to open in Sacramento and Los Angeles Sept. 15 and 16.

Interest of Northern California contractors will be focused on the contract for construction of the Greenville overpass in Alameda county, for which bids will be opened in Sacramento Sept. 15.

First of the 1937-38 grade separation program to be advertised by the commission, the overpass will form an important link in the new Altamont Pass route between valley cities and the Bay area. Road work on the route has been started by Granfield-Farrar & Carlin, San Francisco contracting firm to which this portion of the project was let recently.

#### Reinforced Concrete

The overcrossing will be a reinforced concrete girder structure and will carry the highway over the Southern Pacific and Western Pacific tracks at Greenville.

It will consist of one 50-foot 6-inch span, eight 49-foot spans, and one 16-foot cantilever span.

Bids on the remaining two contracts will be opened in Los Angeles September 16. One involves about a mile of asphalt concrete surfacing in Monterey Park, Los Angeles county, between Atlantic boulevard and New avenue. The other calls for grading and paving with Portland cement concrete about two and six-tenths miles in Orange county, on Hampshire avenue between Coast boulevard and Garfield street.

## UNUSUAL USES FOR NICKEL ALLOY TOLD

The summer edition of INCO, a 34-page magazine published by the International Nickel Company, Inc., devoted to the uses of nickel and nickel alloys, is off the press and may be obtained from the above mentioned company, located at 67 Wall street, New York City.

The following articles are included in the new 1937 summer edition: Rolling a third of a mile of steel a minute; 14,500 feet of welding on 36 fans; Lights reveal a metal problem; New giants take the air, and Winning a fight against corrosion and abrasion.

Light, color, sound and fragrance intensities will be converted into electric impulses and synchronized for lighting effects at San Francisco's 1939 Exposition.

## \$850,000 Track Work for S. F.-Oakland Bay Bridge Railway System Advertised

SACRAMENTO, August 28.—Bids on two contracts for construction of trackwork and track bonding on the San Francisco-Oakland Bay Bridge, to be opened September 15, today were called by Director Earl Lee Kelly of the State Department of Public Works.

The estimated cost of the work called for in the contracts is approximately \$850,000.

Bids will be opened in the offices of the San Francisco-Oakland Bay Bridge Division of the State Department of Public Works, room 811, 500 Sansome St., San Francisco.

#### Speeding Project

The call for bids on bridge trackwork which will carry 10-car trains on a 65-second headway across the bay span followed closely the action of the State Department of Public Works awarding the contract for construction of the San Francisco Viaduct to Eaton and Smith.

Contract R-9 and R-21A involves construction of trackwork on the main bridge, San Francisco loop and East Bay Yard. Bids will be taken under thirty units.

Principal items include: 170,000 pounds of structural steel work; 2,720 MBM framing and placing bridge ties; 10,247 lineal feet of double track, track laying on the East Bay crossing; 10,304 lineal feet double track, track laying on the West Bay crossing; 1,798 lin. ft. double track, track laying on Yerba Buena Island; 27,000 tons imported fill; 100,000 tons ballast; 30,000 pounds reinforcing steel, and 6,000 cubic yards excavation.

#### Track Bonding

Contract R-11 and R-21B involves track bonding on the main bridge, San Francisco loop and East Bay Yard. Bids will be submitted on twenty-seven items, sixteen covering work on the main bridge and San Francisco loop and the remainder covering work in the East Bay Yard.

Principal items include: 24,200 13<sup>1</sup>/<sub>2</sub>-inch 250,000-c.m. bonds; 1,720 350,000-c.m. bonds in lengths from three to six feet; 4,700 lineal feet 1,000,000-c.m. jumper cable connectors between negative feeder taps, and 5,000 lineal feet 500,000-c.m. cross cable bond.

The track will be of open-deck construction. Rails will rest on all-heart redwood which will undergo no preservative treatment. For safe construction the ties in alternate panels will be locked between floor beams.

#### Skid Girders

As protection in case of derailment of bridge trains a skid girder will be placed inside trusses. Guard rails of both timber and steel will be used.

Owing to the expansion of the bridge expansion joints will be necessary. Two sets of split rail joints will be used which will be locked in such a way that not more than one-half the movement of the bridge can take place at a single

## Macco to Excavate Mountain for Ore

Macco Construction Company of Clearwater this week revealed it has been awarded one of the year's most unusual engineering contracts for work in Kern county.

A three million-yard excavation job, the project involves removal of an entire mountain peak to secure valuable ore it is said to contain. Work will be done in the Randsburg district, at the western edge of the Mojave desert, for the Anglo-American Mining Company.

A three-yard shovel and 12 dump trucks will perform the work of removing approximately 6,000,000 tons of rock and earth, which will be put through stamp mills to secure gold and other minerals.

## MORTGAGE PORTFOLIO AUGUST ISSUE READY

"Insurance Mortgage Portfolio," the Federal Housing Administration's magazine, is available to those interested at fifteen cents a copy or \$1.25 per year, the FHA announces. Orders should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C.

Subject matter of the "Insured Mortgage Portfolio" is indicated by the table of contents for August. The following articles are included: Investing in Insured Mortgages; Enlarging Insured Mortgage Volume; Borrowers and Their Incomes; Yields on FHA Insured Mortgages; A Form of Attorney's Opinion on Title; Establishing Standards for Dwelling; and Vital Statistics of Mortgage Insurance.

Joint, according to Chief Engineer C. H. Purcell.

The bridge railway facilities have been designed for an estimated traffic of 50,000,000 people annually, with about 17,000 passengers traveling in one direction during a 20-minute peak. The heavy traffic necessitated use of the most modern interlocking signal system and rail facilities which can safely handle the load.

Most major contracts for the bridge railway facilities have been let or are out for bids. If work progresses satisfactorily the bridge railway will begin operation about November, 1938.

# HOBSON'S CHOICE

There is no alternative, buildings **MUST** be artificially lighted.

Somebody is going to light the buildings you design, and that lighting can be friend or foe to the effect you wish to produce.

Lighting left to others or added as an afterthought may ruin the most perfect architectural effect, while lighting planned as an integral part of the structure will bring out lines and textures, tones and colors.

Lighting **CAN** be practical as well as aesthetically effective, but the combination doesn't just happen—it requires careful planning.

In planning, you have many things to consider. We are concerned only with the electrical service of which lighting is a part. We will be glad to check or help plan the details to assure the effect you want.

## STATE INVITES PROPOSALS FOR SIX CONTRACTS

**Bids Sept. 22-23 on Grading, Bridge Repairs, Construction of Maintenance Station**

SACRAMENTO, Aug. 31.—Six contracts for work on California state highways, five in Northern and one in Southern California, were authorized for advertising today by the State Highway Commission. Grading, surfacing, bridge repairs and work on bridge approaches, and construction of a Division of Highways maintenance station will be figured by contractors, with proposals scheduled for opening September 22 and 23.

Bids on five contracts for work in as many counties will be opened in Sacramento September 22. These projects are located as follows:

**Lassen County:** Grading and surfacing with crusher run base and plant-mixed surfacing about 7.1 miles between Coppervale and Susan river.

**Butte County:** Repairing a bridge across the Feather river one mile west of Oroville and grading and paving about a tenth of a mile of roadway.

### Repairing Bridges

**Marin County**—Repairing two bridges about four miles north of Sausalito, one across the Richardson Bay track of the Northwestern Pacific railway and the other across Northwestern Pacific tracks near Alto.

**Plumas County:** Grading about eight-tenths of a mile of approaches to the Spanish Creek bridge near Quincy.

**Sacramento County:** Construction of a maintenance station building and appurtenances on Folsom boulevard between 64th and 65th streets in Sacramento.

On September 23 bids will be received at the Los Angeles office of the State Highway Engineer for grading and paving about 1.6 miles between Walnut Canyon and Trancas Beach in Los Angeles county.

## A.G.C. Hails Start of New PWA Program; Stimulus to Public, Private Work Seen

Allotment of nearly one-third of the \$359,000,000 fund authorized by the recent Congress for loans and grants by the Public Works Administration for construction of "moral obligation" projects was hailed this week by the Associated General Contractors of America as a signal benefit to the construction industry.

"Published reports of the prosperity of the construction industry

fail to tell the whole story," E. J. Harding, Managing Director of the Association, stated. "While construction volume is greater this year as compared with the volumes of the past three or four years, it is still far below the average volume of the five years preceding the depression, that is, from 1925 to 1929. According to studies which our association has made, the volume of construction in 1936 amounted to only 59 per cent of the average of those pre-depression years."

### Program Important

The great importance of the continuation of the PWA program was recognized early in the year by the Associated General Contractors, which found from its analysis of the statistics of the industry that in normal times public construction constituted 31 per cent of the total volume of construction.

Financing of public construction during normal times was mostly done by local governments, state, county and municipal, the association points out in its analysis of the financial condition of these local governmental units, showing that it was practically impossible for them to finance anything like the amount of construction which they were formerly able to do. The debts which they were obliged to incur during the past five years have so burdened them that instead of being able to devote the proceeds of new capital which they would receive from bond issues and loans to construction, they would be obliged to expend the greater part of such funds to interest on the bonded refundings.

The study made by the contractors' association showed that while, in the pre-depression period, local governments could have for new construction about every \$10,000,000 of total financing \$9,700,000 for new construction, at the present

### MATERIAL PRICE AVERAGE DROPS

The wholesale price average for building materials dropped three-tenths of one per cent during the week ended August 21, according to the weekly survey of the U. S. Bureau of Labor Statistics. The bureau reported the slight decline due chiefly to weakening prices for certain paint materials and gravel. The index for the group as a whole stood at 96.4 per cent of the 1926 average.

During the week, according to the bureau survey, quotations on yellow pine lath and flooring, chinawood oil, rosin and turpentine were higher.

time only \$3,900,000 would be available out of every \$10,000,000.

"Because of these facts, the Associated General Contractors determined that a continuation of the policy of federal aid through PWA was absolutely essential if the construction industry was to maintain its present volume," Harding said. "The association presented these facts to Congress which acted in the passage of the relief act, to make available additional funds for the construction of useful public works by the states and municipalities under the PWA Loan and Grant Plan.

"The early allotment of the funds made available by the relief act, for construction of dummy while the help for volume in the field of private construction will have an opportunity to build up until it will again approximate the level attained in the pre-depression period," Harding stated.

## \$2,036,000 S. F. PERMIT TOTAL DURING AUGUST

Figure Below Record July Total; Frame Permits Far Under 1936

Five hundred and twenty-five building permits were issued during August by the San Francisco Central Permit Bureau of construction estimated to cost \$2,036,872, as compared to 608 permits issued in August, 1936 for work costing \$1,699,327, Chief Clerk S. J. Rosenblum reported yesterday.

Gains were registered in the Class B construction, Alteration and Public Building classifications with drops shown in the Frame Building and Class C construction departments.

Eighty-seven permits were issued for frame construction costing \$451,683 during August. This total was slightly lower than the July figure of \$495,545, and far below the August, 1936 total of \$803,445.

### Total Under July

The August total of \$2,036,872 for all types of construction was substantially lower than the July figure of \$3,382,962 which set a record for 1937. Last month the building permit total was aided by the issuance of a permit for construction of the \$2,283,377 San Francisco-Oakland Bay Bridge Terminal Building.

Contributing heavily to the August permit figure was a permit for construction of the \$435,389 Richmond-Sunset Sewage Disposal Plant to be erected in the southwest corner of Golden Gate Park. Largest permit for private construction was issued to the Schmidt Lithograph Company for a \$175,000 plant addition.

During the first eight months of 1937, 5480 permits were issued for construction estimated to cost \$16,372,615. This total was substantially higher than the \$12,393,732 figure for which 4875 permits were issued in the first eight months of 1936.

### Figures Classified

Following is a classification of permit figures for August, 1937, and August, 1936:

## SCHADER BIDS ISLAND TRACK

A. D. Schader, 144 Spear St., San Francisco, yesterday submitted the low bid to the San Francisco Bay Exposition Co. for construction of a yard railroad track system on Yerba Buena shoals, site of the 1939 Golden Gate International Exposition. Schader's bid was 20,665 on the main proposition, and \$26,555 on the alternate proposal, exposition officials said.

The main proposition calls for constructing about 8,055 ft. of track, and the alternate provides for an additional 3,032 ft. of track. As in other recent exposition bid-openings, only the low bid was made public.

## Institute Will Hold Conclave Next Month

The American Institute of Steel Construction will hold its Fifteenth Annual Convention at the Greenbrier Hotel, White Sulphur Springs West Virginia, the last week in October. General business sessions will be held in the mornings on Tuesday, Wednesday, Thursday and Friday, October 26 to 29, inclusive. This will leave the afternoons free for special forums, conferences and group meetings, an arrangement which has been made for the first time at this year's convention. It was felt by the Board of Directors of the Institute that a program of this kind would permit of more thorough study of the problems of the industry and give an opportunity for more business to be transacted.

The President's reception to members and guests will be held Tuesday evening. A bridge tournament for ladies and gentlemen will be held on Wednesday evening. The annual banquet will be held on Thursday evening, and the get-together dinner on Friday evening.

The convention will be preceded by a meeting of the Board of Directors on Monday evening, and followed by a meeting of the Board for the election of new officers.

## WESTINGHOUSE LISTS LIGHT A. C. WELDER

The Midget Marvel A-C Welder, designed to meet the need for a low cost a-c welder for use in maintenance and repair as well as light construction work, is announced by the Westinghouse Elec. & Mfg. Co.

The welder comprises a transformer and control which is especially designed for alternating current welding. The new set has an operating efficiency of 87 per cent at normal loads, it is claimed.

## S. F. TERMINAL EXCAVATION IS 80% COMPLETED

Purcell Reports Rapid Progress  
On All Sections of Span  
Railway

Eighty per cent completion of the excavation for the Terminal Building of the San Francisco-Oakland Bay Bridge Interurban Railway was announced yesterday by Chief Engineer C. H. Purcell in a progress report filed with Director of Public Works Earl Lee Kelly. The work is under way in the block bounded by Mission, Howard, Fremont, and First streets in San Francisco. Simultaneously with the excavation at this site, pile driving is in operation with two pile driving rigs continuously at work.

Concrete foundations for the Terminal Building proper are expected to be started late this week. Meanwhile, excavation was started last week in the block west of First street, while demolition of the remaining structures continued in the block east of Fremont street by the contractors, MacDonald and Kahn.

Contract for more than \$600,000 was awarded last week to Eaton & Smith for construction of the San Francisco Viaducts, which will carry trains from the bridge proper to the terminal. The contractors are placing material orders and are assembling their construction plant in preparation for immediate work.

### Eastbay Contracts

The easterly approach to the bridge is likewise bustling with activity, with work under way on the Interurban Electric (S.P.) 26th street overhead, the Port of Oakland highway overhead, the interurban electric (S.P.) overhead and catenary bridges at the yards.

The forty units of concrete piers required for the Port of Oakland highway overhead, east of the Toll Plaza, have been completed by the contractors, Bates & Rogers, and are ready for the superstructure. Foundation piles for all of the 26 piers required for the interurban electric (S.P.) overhead in the yard, opposite the Toll Plaza, have been driven, while pile driving for all the masonry piers in the 26th street overhead, west of the Southern Pacific main line tracks, has also been completed. Foundations for eight of these piers have been completed, with ten more yet to be finished.

The Bridge Railway is expected to be in operation by Nov. 1, 1938.

New orders for steel boilers totaled 5,091 during the first six months of 1937, compared with orders amounting to 4,389 taken during the same period in the preceding year, the Bureau of Census reports.

# STATE SECURITY FORM PROCEDURE IS SIMPLIFIED

## Commission Adopts New Form For Reporting Monthly Contributions

SACRAMENTO, Calif. Aug. 30. —New and simplified procedure in reporting monthly contributions to the Unemployment Trust Fund was adopted today by the California Unemployment Reserves Commission.

The Commission, announcing it was acting to save employers of California thousands of dollars monthly, revoked its reporting form known as CURC 3, which called for as high as 114 separate figures, and substituted one calling for only fifteen.

First of the new forms will be mailed to more than 20,000 employers before October 1. The old CURC 3 will be used only one more month, for reporting August contributions.

Two principles caused the action, according to Jas. L. Matthews, chairman of the Commission. The first, he said, was the desire of Governor Frank F. Merriam to cause as little trouble as possible to California employers in making reports to the fund. The Governor expressed the principle last July when he signed a group of bills sponsored by the Department revising the Unemployment Reserves Act.

### Standardized Forms

The second principle, Matthews said, was the desire of the commission to be in line with requests of the Social Security Board which is advocating standardized forms. This request was received, the chairman said, some time after officers of the Commission began work on the simplification of the form.

"The new form," Matthews said, "will save employers of the state thousands of dollars in computing the amount of their contributions to the Unemployment Trust Fund."

"With all the various taxes the employer must pay, and the state and federal contributions he must make, it is not the policy of the Commission to burden him further with an extensive report to the fund. Our initial form was instituted during the pioneer period of this new legislation.

### Employee Protected

"Under the new form, the employee, who if unemployed and eligible after January 1, 1938, will receive benefits, is wholly protected. There are 1,300,000 contributing employees in California.

"Previous to July 1 of this year, employers were required to make quarterly reports only, and with the computations coming every 3 months, could well give the Commission the information on CURC 3.

"But when the Commission followed a request of the Social Se-

# Concrete Placing Completed in Two District Tunnels

Placing of concrete lining has been completed in two San Rafael tunnels Nos. 1 and 2 located on the distributing system of the Metropolitan Aqueduct, according to General Manager F. E. Weymouth of the Metropolitan Water District.

With the completion of the lining in these tunnels, progress summaries indicate that more than 104 miles of aqueduct tunnels have been excavated and 95 miles of these have been lined with concrete and completed. The entire aqueduct project is 65 per cent completed at the present time.

Known unofficially as the Trinity tunnels because they are located in the cities of Pasadena, Los Angeles and Glendale, the two bores just completed have a combined length of 9,716 feet and constitute the most westerly work now under construction on the 392 mile aqueduct system. Excavation work on these tunnels was started in October, 1935.

The San Rafael tunnels from an important junction point in the distributing system of the Metropolitan Aqueduct. Pipe lines to be constructed west of the tunnels will carry water to the cities of Glendale, Burbank, Beverly Hills and Santa Monica. Diverted south from a point in Eagle Rock Canyon, between the two tunnels, aqueduct water will be carried through another line to the cities of Los Angeles, Compton, Torrance and Long Beach.

Bids are to be opened September 1 for the construction of the first 18 miles of the later line, which will serve as the western cross-feeder to the distributing system. Work on this feature will probably be started within the next 30 days.

Stretching clear across the state, the aqueduct will carry a billion gallons of Colorado River water a day to the thirteen Southern California cities that comprise the Metropolitan Water District. Progress records indicate that the system will be put into operation in 1939.

## LABORATORIES' PLANT ADDITION IS STARTED

Work has begun on an addition to the principal office and testing station of Underwriters' Laboratories, Inc., at 207 E. Ohio street, Chicago. The plans call for a 4th and 5th floor facing Ohio street, centrally spaced with a 160-foot frontage, providing about 10,000 square feet additional floor space. Another electric elevator is to be installed in a shaft if the present near the east end of the present structure.

The board and adopted a rule requiring monthly contributions, it decided that a simplified form was necessary if the burden on employers was to be lessened."

# OPEN PROPOSALS FOR MENDOCINO, HUMBOLDT JOBS

## N. M. Ball Sons & E. E. Smith, Harold Smith Low Bidders On State Contracts

(Special to Daily Pacific Builder)  
SACRAMENTO, Sept. 1. — Bids aggregating \$69,833 for construction of a reinforced concrete bridge in Mendocino County and repairs to an existing bridge in Humboldt county, were opened today by the State Division of Highways.

N. M. Ball Sons and E. E. Smith, bidding jointly, submitted the low proposal of \$38,969 to the State Division of Highways for repairs to the existing timber bridge across Big Lagoon about ten miles north of Trinidad in Humboldt county.

Other bidders were: F. Kaus, \$39,699.78; M. A. Jenkins, \$43,327.50; W. K. Van Bokkelen Construction Co., \$43,595; F. J. Maurer, \$41,092; John Boeca and Co., \$48,224; Moore-Fraser Co., \$49,902.50, and Alfred H. Vogt Co., \$52,697.50.

Principal items in the contract were: 178,000 pounds of reinforcing steel and 1,635 cubic yards of Class A Portland cement concrete.

Harold Smith, St. Helena, at \$30,864, submitted the low bid for construction of a reinforced concrete bridge at Dry Creek between McDonald and Yorkville in Mendocino county.

Approximately 1.2 miles of approach road were involved in the contract. The roadbed is to be graded and penetration oil treatment applied.

Other bidders were: Claude C. Wood, \$31,520.50; Rock & Gravel Trucking Co., \$32,936; Guerin Bros. \$33,004; N. M. Ball Sons, \$36,612.30; John Roca and Co., \$37,007; W. K. Van Bokkelen Const. Co., \$39,450; Charles L. Harney, \$43,960.30, and Peter J. McHugh, \$45,213.50.

The work involves the following principal items: 12,200 cubic yards of unclassified excavation; 36 tons of liquid asphalt; 43,800 pounds of reinforcing steel; 223 cubic yards Portland cement concrete, and 490 lineal feet CMP.

## BOOKLET ON WOOD INTERIORS ISSUED

The National Lumber Manufacturers' Association, 1337 Connecticut avenue, Washington, D. C., announces publication of a new booklet, "New Interior Ideas in Wood."

The 21-page booklet is fully illustrated. Subjects include: the fireplace alcove; living room corner; dining room corner; paneled living room; the small den; kitchen cupboards and the recreation room.

Other booklets in the series are: "The Soft Warm Beauty of Paneling", "Mellow Wood Interiors", and "Wood Walls". All may be obtained from the Association at the price of ten cents each.

## DO NOT ADVERTISE \$260,000 PIPE PROJECT SOON

### Public Utilities Commission Preparing Plans for Peninsula 36-Inch Line

Bids will be called prior to October 1 for construction of a \$260,000 pipe line to serve the area from Redwood City to South Palo Alto through Hetch Hetchy water, the San Francisco Public Utilities Commission revealed yesterday.

The Board of Supervisors approved an ordinance calling for an appropriation of \$260,000 from the Water Reserve Fund for construction of the pipeline several months ago. At the same time they applied for a PWA grant of forty-five per cent of the cost of the project.

No word has been heard from Washington as to the success or failure of the application. However, the pipeline will be constructed regardless of whether a PWA grant is allotted or not, the Public Utilities Commission indicated yesterday.

The pipeline as proposed by the Public Utilities Commission will connect with the present peninsula pipeline terminus at El Camino Real. It will extend to South Palo Alto, serving Atherton, Menlo Park and Stanford University. The line will be 27,000 feet long and will consist of 36-inch salvaged pipe.

It is expected the line eventually will be extended as far south as Sunnyvale. When extended that distance and operating to full capacity, Utilities officials estimate the line will deliver 30,000,000 gallons per day.

The original proposed financing plan called for a PWA grant of \$117,000. Approximately \$80,000 of the \$143,000 balance was to have been advanced by the communities to be served. This would have reduced San Francisco's cash outlay to \$63,000 which would have been repaid through a special surcharge.

No definite plan of financing will be advanced until the success or failure of the PWA application is known. If the grant is made the original plan will probably be followed.

### MATERIAL PRICE AVERAGE GAINS

Average wholesale prices for building materials advanced 0.1 per cent during the week ended August 28, the U. S. Bureau of Labor Statistics reported yesterday. The group index stood at 96.5 per cent of the 1926 average, as compared with 86.9 per cent a year ago and 85.3 during the corresponding period in 1935.

The slight rise in the group average, according to the bureau, was accounted for by higher prices for yellow pine flooring, chinawood oil, rosin, turpentine and sand. Lower prices were reported for yellow pine lath, doors and gravel. The brick and tile, cement and structural steel subgroups showed no change from the preceding week.

## STATE INVITES PROPOSALS FOR TWO CONTRACTS

### Bids Sept. 29 on Alameda Grade Separations, Mendocino Bridge Project

SACRAMENTO, Sept. 7.—Two contracts, providing for construction of a bridge and two grade separations, today were authorized for advertising by the State Highway Commission.

Bids on both contracts, it was announced, will be opened in Sacramento September 29.

The grade separation project involves construction of one overpass and one underpass, both in Alameda county.

The overcrossing will carry the new Altamont Pass highway over the tracks of the Southern Pacific Railway at Redmond. The other structure will take the highway below the Western Pacific tracks at Stone Cut. Construction of both crossing eliminations is included in a single contract.

The bridge project is located in Mendocino county about three and one-half miles north of Point Arena.

## FIFTEEN BIDS SUBMITTED ON ELDORADO JOB

### Hemstreet & Bell Low on Grading Contract; Cannon Bids Armor Coat

SACRAMENTO, Sept. 8.—Low bids aggregating approximately \$207,000 were received here today by the State Highway Commission on two contracts for work in Eldorado and Merced counties.

Hemstreet & Bell, Marysville, submitted a low bid of \$163,731 for grading and surfacing about four and three-tenths miles in Eldorado county between Clarks Corner and 1.25 miles west of Eldorado.

Fifteen bids were received on this contract from contractors in Northern and Southern California, Nevada and Oregon.

Second and third low bidders on the Eldorado county project were Macco Construction Co., Clearwater, with a proposal of \$169,495; and Heafey-Moore Co., Fredrickson & Watson Construction Co. and Fredrickson Brothers, Oakland, at \$178,431.

Surfacing on this project will be plant-mixed medium curing type, on crusher run base.

### Armor Coat Contract

For application of armor coat to about 10.5 mi. of existing pavement and borders in Merced county, low bidder was J. A. Cannon, Hayward, with a proposal of \$43,761.

Second and third low bidders, respectively, for the armor coat contract, were Granite Construction Co., Ltd., Watsonville, \$46,976; and Jones & King, Hayward, \$48,496.

Nine contractors figured the project, which is located between Los Banos and 10.5 miles east.

Specifications call for a bridge consisting of one 120-ft. steel truss span, one 66-ft. steel beam span, two 50-ft. steel beam spans and one 30-ft. 6-in. steel beam span, on concrete piers with timber pile foundations.

The contract also calls for grading, surfacing with imported material, and applying penetration to four-tenths of a mile of roadway.

All materials and equipment to be removed will become the property of the successful contractor. Bids will be entertained on a sale basis or on a contract basis. In the case of a sale, the contractor offering to perform the work and pay the most for the materials and equipment will be considered first. In case no sale offers are received, the offer proposing to charge the least for performing the work will be considered.

- (A) United Concrete Pipe Corp.—Applying to Sch. 21-P, 22-P and 23-P: Will accept the award of any or all schedules. If awarded any two schedules, deduct from Item No. 1 3c per c y. of excav. on each schedule. If awarded three schedules, deduct from Item No. 1 8c per c y. of excav. on each schedule. Stipulations applying to Sch. 21-SC, 22-SC and 23-SC: Will accept any two or three schedules, but will not accept any one schedule alone. Applying to Sch. 21-SE, 22-SE and 23-SE: Will accept any two or three schedules but will not accept any one schedule alone.
- (B) R. G. Clifford—Bid based on provision that all three schedules—21, 22, and 23—be awarded and bidder will not accept any one or two. Steel pipe to be furnished by Western Pipe & Steel Co.
- (C) Floyd Shefner—No stipulations. Pre-cast pipe to be furnished by American Concrete & Steel Pipe Company and steel pipe by Consolidated Steel Pipe.
- (D) D. W. Thurston—Will not accept Schedule 22-P with Sch. 21-P. NOTE: Bidder failed to complete his prices on Sch. 21-P. Centrif. cast concrete pipe to be furnished by American Concrete & Steel Pipe Co., and steel pipe by Southwest Welding & Mfg. Co.
- (E) American Concrete & Steel Pipe Co.—(1) Will accept all of the three schedules as bid upon; that is, the three "S" schedules together, or the three "SC" to-

- gether, or the three "SE" together. An award of one or two steel schedules is not acceptable. (2) Will accept any one or all of the three pre-cast pipe schedules as bid upon. (3) If more than one schedule is awarded and if separate awards are made for each schedule, and separate contracts are entered into covering all such awards, deduct \$1000 per schedule. Pre-cast and steel pipe to be furnished by bidder.
- (F) Morrison-Knudson Co.—Bidder will accept award of all three schedules. If awarded two schedules only, add 50c per lin. ft. on all steel pipe in trench. Will not accept less than two schedules. Steel pipe to be furnished by Western Pipe & Steel Co.
- (G) Winstan Bros. Co.—Will accept the award on one schedule only. Steel pipe to be furnished by Consolidated Steel Corp.
- (H) Emsco Derrick & Equip. Co.—If awarded any two schedules, deduct 37½¢ from each unit of items 19, 20, 25, 26, 28 and 29, and change Item 2 on all schedules to \$1.07, and deduct ½¢ per sq. ft. from Items 32 and 33 and change Item 6 to 40c on all schedules. Pre-cast pipe to be furnished by American Concrete & Steel Pipe Co.; steel pipe by Emsco and Macco Constr. Co. and Marco-Robertson, Ltd.
- (I) Metropolitan Construction Co.—

- Will accept any or all schedules. For the award of two schedules, deduct 1½¢ from all items; for award of three schedules, deduct 2¢ from all items. Steel pipe will be furnished by bidder or others satisfactory to district.
- (J) Drainage Constr. Co., Elliott & Stroud-Seabrook—All schedules or none. Steel pipe to be furnished by Western Pipe & Steel Co.
- (K) J. F. Shea Co.—(1) For the award of any two schedules, deduct from Item 1 of both schedules considered 12½¢ per c y. (2) For the award of any three schedules, deduct from Item 1 of all schedules 13½¢ per c y. (3) For the award of any two of spun mortar schedules, deduct in addition to stipulations 1 and 2, 7c per c y. from Item 1 of spun mortar schedules. (4) For the award of all three schedules of spun mortar type, deduct, in addition to stipulations 1 and 2, the amount of 8½¢ per c y. from Item 1 of spun mortar schedules. Steel pipe to be furnished by Consolidated Steel Corp.
- (L) Lindgren & Swinerton, Inc., Williams Bros. & Haas, Inc.—No stipulations. Pipe will be furnished by Western Pipe & Steel Co.

No bids were received for Schedules 21-M, 22-M and 23-M, for centrifugally impelled machine-trowelled mortar lining of the steel pipe under 21-S, 22-S and 23-S, the lining to be placed subsequent to the laying of the pipe, under the steel pipe schedules.

Plans for the line were prepared by the district engineer under the direction of the General Manager and Chief Engineer, F. E. Weymouth. The line is 17.4 miles in length and is located in the cities of Los Angeles, South Pasadena, and Vernon and in unincorporated territory of the county.
